### Adobe Connect 9.0.2 Add-in

Search Adobe Support

Starting around mid-January 2013, Adobe will start upgrading Adobe Connect 9 hosted customers to Adobe Connect 9 Update 2 (9.0.2).

This update requires a new Adobe Connect Add-in for functionality specific to meeting hosts and presenters on Windows and Mac OS. You will be asked to install the new Add-in in the following circumstances:

- You try to start or join 9.0.2 meeting for first time and have older version of the Add-in installed.
- You start screen sharing, application sharing, or share PowerPoint (PPTX format) files, and don't have the latest version of the Add-in installed.

The new Add-in fixes the following bugs:

1. 3084227: Add-in quits when making recording offline
2. 3303154: Windows Add-in crashes when Add-in instance closed while making recording offline
3. 3328652: Add-in crashes when user start -> stop -> restart screen share on Windows 7
4. 3340821: Video out of sync from audio if an FLV file, created by Recording offline feature, is converted to any other format
5. 3337375: Black dotted stripe/line overlaid on camera feed
6. 3368170: connectaddin.exe is not digitally signed

The new Add-in is backwards compatible, so you can download and install it before 9.0.2 upgrade. The version of the new Add-in is 11.2.2510 (Windows) and 11.2.250.0 (Mac OS).
